

3-LAYER ESD BENCHTOP MAT ROLL (0.6X10M, TH.3MM)

SKU: 640733

ESD TABLE MAT WITH CONDUCTIVE CENTRAL LAYER

Anti-static ESD safe 3-layer benchtop mat with textured surface, available in **2 colours**.

Long-lasting matting. It provides an excellent protection for the safe handling of electrostatic sensitive devices.

It is made up of 3 layers: the external **static dissipative** layers enclose an internal **conductive** layer.

Its **highly durable work surface** is resistant to most oils, acids, abrasion, heat and solder splashes.

Due to its excellent lay-flat properties, it can be loose-laid on the workbench without using of adhesives.

The soft rubber provides a cushion effect which is ideal when working with static sensitive components and assemblies.

For **maintaining** an optimal electrical performance, mats should be regularly cleaned with an ESD safe cleaner. The use of IPA wipes, normal cleaners or general anti-bacterial products is NOT recommended.

Specifications

- Colour: **Dark blue, Grey** – Finishing: Textured
- Dimensions: **60 cm x 10 m** – Thickness: **3 mm**
- Material: Synthetic rubber
- Electrical properties (typical values):
 - Surface layer resistance: $10^{(8)}$ Ohms per square
 - Bottom layer resistance: $10^{(4)}$ Ohms per square

- Standards & Regulations:: RoHS, REACH, CE, IEC 61340-5-1, ANSI 520.20.
