

WFE WELLER FUME EXTRACTION UNIT | T0053640299N

SKU: T0053640299

WELLER WFE FUME EXTRACTION UNIT

WFE – Portable fume extraction unit for tip suction, suitable for 1/2 workstations.

Requires **external compressed air** supply to operate (NOT included). The vacuum is generated by a maintenance-free compressed air converter.

The contaminated air is purified by a pre-filter and main filter system. A compressed air cleaning filter removes additional odours caused by the compressed air. This highly efficient filter system makes the WFE a genuine air recovery system.

Weller **FE type (Fume Extraction) soldering irons can be connected directly** to the unit, without the need of accessories.

Provided with **filter set**, including: compressed air filter, compact filter (H13 particle filter and wide band gas filter, 50% active carbon / 50% chemisorb) and F7-class pre-filter mat.

Weller product no.: **T0053640299N**.

Specifications

- **Designed for industrial, long term use**
- Suitable for a number of max. **2 workstations** / 2 FE soldering irons
- Requires clean and oil-free compressed air
- Diameter: 140
- Power: **6 bar**

- Air consumption: **30 l/min**
- Capacity: 30 l/min
- Noise level (distance 1 m): < 39 dB(A)
- Max. blower vacuum: 20.000 Pa
- ESD safe: yes
- Dimensions: 140 x 140 x 200h mm.
