

ANTI-FATIGUE ESD FLOOR MAT (2 SIZES, TH.17MM)

SKU: 640837-XY

ANTI-FATIGUE ESD MAT, 17MM THICK

Anti-static ESD safe floor mat equipped with grounding studs. **2 sizes** available.

Designed for operators who stand for many hours at the same workstation.

The upper layer made of soft foam **stimulates the leg muscles**, and also **protects the operator from the cold** of the flooring below.

Specifications

- Selectable sizes: **450 x 600** x 17h mm (640837X), **600 x 900** x 17h mm (640837X)
- Snap fasteners: Male, Ø 10 mm
- **Non-slip coating**
- Chemical resistance to alcohol and solvents
- ESD PROPERTIES:
 - RS of the **dissipative top layer**, made of soft plastic: $10^8 - 10^9$ Ohm
 - RS of the **dissipative lower layer**, made of polyurethane: $10^8 - 10^9$ Ohm.

Method of use:

- Grounding the mat via cable and press stud is generally recommended even if the mat is placed on ESD safe flooring, because of the **dissipative/dissipative** double layer (the decay time is not as fast as in the case of dissipative/conductive double-layer mats).

VARIATIONS

SKU	Description	Dimensions
640837X		450x600 mm
640837Y		600x900 mm
