CENTRIFUGE FOR DISPENSING SYRINGES (3/5/10/30CC)

SKU: 159563B

CENTRIFUGE FOR SYRINGES AND CARTRIDGES

Tabletop centrifuge for dispensing syringes equipped with fixed-angle rotor with electric brake and speed adjustment.
Effectively and quickly removes the air trapped in liquid materials that are stored in syringes.
Ideal for solder paste and other viscous materials.

Key benefits

- Centrifuge the syringes before pneumatic or mechanical dispensing, significantly improves process control and reduces waste
- The operator can adjust the acceleration force of the centrifuge for low to high-viscosity liquids
- The electric brake allows the rotor to be stopped quickly at the end of the cycle, saving additional time.

Specifications

- Class 1 desktop centrifuge
- Centrifuges 4 syringes with capacity from 3 cc to 30 cc
- Adjustable RPM
- Audible signal at the end of the process

- Cover safety lock
- Switch-off function when the lid is opened.

ATTENTION: Standard cartridge holders in the centrifuge are ideal for processing 30 cc syringes - Additional adapters (included) also allow 3 / 5 / 10 cc syringes to be securely held in place.
