

ESD SHIELDING METAL-IN TUBING ROLL (7 SIZES)

SKU: 64040_SHIE

SHIELDING TUBE, 100M LENGTH

ESD safe "metal-in" tubing roll with shielding properties, semi-transparent and heat-sealable.

Thanks to the metallic intermediate layer, it creates a Faraday cage shielding effect, ensuring to the product placed inside a total protection from charges and electrostatic fields.

Perfect for shielding boards and components from external discharges.

Specifications

- Roll length: **100 m**
- Selectable sizes (**Width**): **100 mm, 150 mm, 200 mm, 250 mm, 300 mm, 400 mm, 800 mm**
- Nominal thickness: **75 µm**
- Outer layer material: Dissipative polyester film
- Shielding material: Aluminium metallisation
- Inner layer material: Dissipative polyethylene
- Surface resistance (inner): $<10^{11} \Omega$
- Surface resistance (outer): $<10^{11} \Omega$
- Compliant with CEI 61340-5-1 and RoHS standards.

ATTENTION: DELIVERY TIMES OF 90 DAYS ON AVERAGE
