

KARLIN PORTABLE HEAT SEALER FOR CUSTOM BAGS

SKU: 148101K

MANUAL WELDER FOR DOTTED-LINE HEAT SEALING

New patented method that revolutionises the way of closing and reopening packaging

Karlin - Cordless welder equipped with heating wire and ceramic roller for heat sealing plastic bags and sheets.

It revolutionizes the way of closing bags thanks to a patented method of dotted-line sealing.

Using Karlin, opening and reclosing bags is no longer a problem: **its dotted-line sealing can be torn in a regulated way** (not randomly) **so that the bag can be reused and resealed.**

Specifications

- Handy and lightweight, with pro-grip handle
- Power switch and safety button
- Rechargeable battery: NI MH AA2400mAh, 4.8 V
- **Temperature range: 200 °C**
- **Heating time: approx. 3 sec (instant)**
