

SMA10L - PIERGIACOMI PCB SEPARATOR WITH 2 BLADES (FR4)

SKU: 151405C

ELECTRIC DEPANELING MACHINE SMA-10L

Piergiacomini SMA-10L - PCB Separator for v-scoring boards, equipped with 2 blades.

Especially designed for long boards (Lighting industry), up to 600mm length.

Thanks to its unique design, SMA-10L can depanel both short and long boards, **bare or populated**. In this last case the maximum component height is **32mm**.

The alignment system allows **three degrees of regulation**. The first regulation is the height of the reference plan in relation to the cutting tool; this is achieved by an apposite knob. Then a guide allows to easily position the scored line aligned with the cutting tool and finally a mechanical reference assures the correct positioning of the panel.

The guide can be easily adjusted to compensate different scoring depth.

Specifications

- Power: < 100W - Voltage: 230V
- Works on **CEM and FR4 PCBs**
- With **2 blades**, 125mm diameter
- PCB thickness (bare): from 0.8 to 1.6 mm

- Max. PCB dimensions: 220x230 mm
- Max. PCB dimensions (with 2 table extensions): 600x230 mm
- Manual Z control (blades adjustment): 10mm
- Manual table's height adjustment: 10mm
- Working area: 750x1200 mm
- Manufacturer: Piergiacomini - Made in Italy
- CE mark.
