

ANTI-STATIC ESD FLOOR MAT QUICKSTAT ECN (8 COLOURS, 2X23M)

SKU: QUECN

QUICKSTAT ECN ESD FLOOR MAT IN ROLLS

The anti-static ESD safe floor mat Quickstat ECN has an extremely easy, quick and cost-effective installation process.

Unlike most of ESD safe floor mats, its conductivity doesn't depend on the type of adhesive or on the installation process. In fact, thanks to the highly conductive lower side, Quickstat floor mats can be simply layed by using a common bi-adhesive tape (for small areas) or conductive glue, making possible an effective installation at extremely low costs.

A **copper grid** on the sub-floor is required for grounding.

Roll dimensions:	2 x 23 m
Selling unit:	square meter
Minimum order quantity:	46 smq and multiples

Specifications

- Thickness: **2 mm**
- Material: **PVC**
- Floor type (ISO 10581): Homogeneous vinylic flooring, **static dissipative**

- Available colours: **Light grey** (131857A), **Medium grey** (131942N), **Dark grey** (131942B), **Beige** (131942C), **Warm beige** (131942D), **Green** (131942E), **Dark green** (131942F), **Medium blue** (131732E)
- ATTENTION: In case of gluing, the laying of Quickstat requires a humidity rising damp value under 2%.

VARIATIONS

SKU	Description	Colour
